PRIMARY KEY IN SQL

SKILL</ S/ASH>

A primary key is a field in a table which uniquely identifies each row/record in database table.

```sql
CREATE TABLE Customers ( ID int NOT NULL,
First Name VARCHAR (20) NOT NULL,
Last Name VARCHAR (20) NOT NULL,
Age int(10) NOT NULL,
City VARCHAR (30),
Primary Key (ID));
```

Note - To view table use the command

```sql
Select * FROM Customers;
```

MySQL 5.7 Command Line Client

```
+---------+---------------+-------------+---------+----------+
6 rows in set (0.01 sec)

mysql> select *from Customers;
+---------+---------------+-------------+---------+----------+
| ID      | First Name    | Last Name   |  Age    |   City   |
+---------+---------------+-------------+---------+----------+
|         |               |             |         |          |
|         |               |             |         |          |
|         |               |             |         |          |
|         |               |             |         |          |
|         |               |             |         |          |
|         |               |             |         |          |
+---------+---------------+-------------+---------+----------+
```
